$R_1$  is an H or a C1-C5 hydrocarbon; X is a C1-C10 hydrocarbon, a heteroatom or

T0471

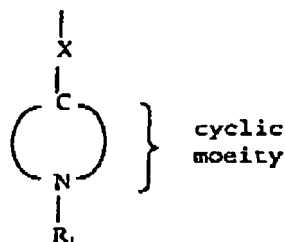

Z is a heteroatom and d is 0 to about 6, the polysiloxane component has a viscosity of about 1 centistoke to about 1,000,000 centistoke and is effective as a hair conditioner in a hair shampoo, wherein the composition is formulated as a clear hair shampoo composition.

16 21. (Amended) A method of making a clear hair shampoo composition comprising:

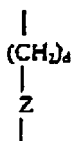

B2 combining (1) a microemulsion comprising an effective amount of an emulsifier component, a polysiloxane component in an amount effective as a hair conditioner in a hair shampoo and water and (2) an effective amount of a deterative component at conditions effective to form a clear hair shampoo composition, wherein the polysiloxane component comprises at least one side chain component A having the general formula:

Cancel claim 22, without prejudice.

#### REMARKS

This Supplemental Response A is being submitted based on recent telephone conversations between Examiner Boyer and applicant's attorney.

Specifically, claims 6, 21, 23 and 24 have been amended and claim 22 has been canceled, without prejudice, based on such telephone conversation.
